

Introduction

This document is intended to help the external lead suppliers to supply leads without any issue or confusion. This document explains lead posting method and example containing sample request and response along with code to help the lead suppliers. This information is subject to change without notice. This document contains confidential and proprietary business information. Any use or distribution not expressly allowed by the confidentiality agreement is strictly prohibited.

Overview

Method

Leadstream accepts leads through the HTTP POST method. Lead generators are requested to send leads via HTTP POST to the URL specified in the Leads Specifications section.

Format / Data Type

This API contains required and optional both type of fields. If the required field is not supplied or the field contains blank or null value, then this API will not accept the lead. **Lead data can be sent in the request in any order, but all of the field names are case sensitive and must match examples in the specifications.**
